VTOL avionics carrier 76 x 70 x 1.6 mm, 2 layers — generated from spec/carrier_spec.json

Nets connect by global labels (net names = spec nets). Logic GND and GND_PWR meet only at NT1 (Power sheet).

NOT_VERIFIED: never built or powered. Module pin orders (GY-521, BMP280, OpenLog, buck, NEO-7M lead) are assumptions — check silkscreen.
